

1st AFRICAN BUIATRICS CONGRESS — NAMIBIA —

ADVANCING CATTLE AND RUMINANT HEALTH AND PRODUCTION ACROSS AFRICA

25 - 27
November 2027

WINDHOEK
Namibia

Join veterinarians, researchers, livestock producers, policymakers, students and industry leaders from across African and around the world for the first African Buiatrics Congress.

Together we will explore innovative approaches to cattle health, sustainable livestock production, disease prevention and veterinary education that will shape the future of African livestock.

SCIENTIFIC TOPICS

Transnational, emerging
Infectious diseases

Buiatrics and cattle
medicine/health

One Health: linking animal
and human health

Public health, food safety
and export compliance

Livestock productivity and
value chain development

Challenges in reproduction
and herd fertility

Orthopedics and lameness
diagnostics and treatment

Precision livestock farming

Veterinary education

Climate resilience, animal
welfare and sustainable
livestock systems
